Objective

Creative and detail-oriented UI/UX Developer & Designer with a strong foundation in front-end technologies, user-centered design principles, and responsive web design. Adept at translating user needs into visually engaging and functional interfaces. Proficient in modern tools and technologies like Figma, Adobe XD, HTML, CSS, JavaScript, React, and Tailwind CSS. Seeking to begin a career where I can contribute innovative ideas and grow professionally.

TECHNICAL SKILLS

- **Designing Tools:** Figma, Adobe XD, Photoshop, Illustrator
- **Frontend:** HTML5, CSS3, JavaScript, React.js, Next.js, Tailwind CSS, Bootstrap, Wordpress
- **Version Control:** Git, GitHub
- **Soft Skills:**
 - Problem Solving
 - Capable of adapting new situations in less time.
 - Eager to learn new technologies and methodologies.
 - Good Motivational and Leadership qualities.

EDUCATION

-B.Tech in Mechanical Engineering
M.V.G.R College of Engineering, Vizianagaram — 2017–2021
CGPA: 6.85

-MBA in Marketing
A.U College, Visakhapatnam — 2024
Percentage: 57.8%

PROJECTS

-Portfolio Website:

I developed personal portfolio website using HTML CSS JavaScript to show my projects. I developed many projects with responsiveness and quality assurance. The goal is to focus on improving trust and load time of the websites. Here are some projects to explore. ([Link](#))

-Story Website:

I created a fully responsive and scalable story website using React.js, Next.js, Strapi CMS, and PostgreSQL. The platform features multiple categories like Love, Thriller, Horror, Friendship, and Motivational Stories, providing an engaging reading experience. By leveraging Next.js SSR/ISR, the website ensures fast performance and SEO-friendly pages. Content management is powered by Strapi CMS, allowing seamless updates. The project showcases my expertise in full-stack development, CMS integration, API handling, and frontend optimization. (Link)

-Baby Names Website:

In this website any one can search the meaning and others details like religion, cast, astrology etc... of the person name. (Link)

-Smart Irrigation System using Internet Of Things (IOT)

Keeping in mind about Farmers facing major problem in watering their Agricultural field in India. By Deep Analysis we solved the Problem with this Project.
